Novelty (N)	Claims <u>1-10</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-10</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-10 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a process for encapsulating a food particle with a liquid encapsulating material, the process comprising the steps of (a) metering a liquid encapsulating material into a flow restrictor; (b) injecting a gas stream through the flow restrictor concurrently with step (a) to atomize the liquid encapsulating material and to create turbulent flow of the gas stream and the atomized liquid encapsulating material, wherein the gas stream is optionally heated; and (c) adding a food particle to the region of the turbulent flow concurrently with steps (a) and (b), wherein the food particle mixes with the atomized liquid encapsulating material to provide an encapsulated food particle. The encapsulation material encasing the food particle inhibits volatiles such as aromas, moisture and flavors from diffusing out of the particle and inhibits undesirable environmental volatiles from diffusing into the food particle.

Claims 1-10 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
